

# Institutsseminar IFK

## Sommersemester 2016

Freitags, 13.30 – 14.30 Uhr  
 Haus 3, Hörsaal 3 (Helmholtzweg 3)

Datum	Vortragende(r)	Titel	Einladender
<b>29. April</b>	Dr. Christian Kaufmann (Helmholtz-Zentrum Berlin)	Current Topics in CIGS Photovoltaics Research at the PVcomB	Schnohr
<b>13. Mai</b>	Prof. Dr. Thomas Schäpers (FZ Jülich)	Phase-coherent and ballistic transport in InAs-based nanowires	Ronning
<b>27. Mai</b>	Prof. Dr. Enrico Gnecco (OSIM, FSU Jena)	Controlled scanning probe manipulation and lithography: What can be learned on nanoscale friction and abrasive wear?	Fritz
<b>10. Juni</b>	Prof. Gerhard Wurm (Universität Duisburg-Essen)	From Planet Formation to Dust Devils on Mars: Some Physics of (Cohesive) Granular Matter in Radiation Fields at Low Ambient Pressure	Jäger
<b>24. Juni</b>	Prof. Dr. Michael Gottfried (Philipps Universität Marburg)	Surface Science of Porphyrins, Phthalocyanines, and Corroles	Fritz
<b>8. Juli</b>	Jun.-Prof. Dr. Benjamin Stadtmüller (Technische Universität Kaiserslautern)	A momentum space view on electronic states and electron dynamics of molecular adsorbate systems	Forker

(Stand vom 18. August 2016)
