

Institute Seminar Astrophysics

Summer term 2025, Wednesday 10-12h

chairs: Prof. Ralph Neuhäuser & Prof. Alexander Krivov

Schedule

- Apr 9: Preliminaries
- Apr 16: Nicole Pawellek (U Vienna): Population synthesis for debris disks
- Apr 23: Ernst Paunzen (U Brno): Is the upper main sequence a mess?
- Apr 30: TBD
- May 7: Harald Mutschke: Safety instructions
- May 14: Kai-Uwe Michel: New results on exoplanets in multiple stars
- May 21: Gael Rouille: UV radiation from comets
- May 28: Baha Dincel: New runaway stars in supernova remnants
- June 4: TBD
- June 11: Ralph Neuhäuser & Valeri Hambaryan: Historical novae and nova shell expansion
- June 18: Theory group: ALMA observations of debris disks
- June 25: Markus Mugrauer: Update on observations in GSH
- July 2: Aritra Basu (TLS): Dark Matter Search with Radio Astronomy
- July 9: Institute full meeting

(last update: 9 Apr 2025)
